

# TENOR SAXOPHONE

## SUPREME

*The enjoyment and evidence of playing*

After 100 years of innovation, design, and manufacturing of the saxophone, Henri SELMER Paris redefines the modern identity of the tenor saxophone with the Supreme.

The Supreme tenor achieves the feat of surpassing the flexibility and sensation of lightness found in historic models and combining those features with the precision and exactness of pitch found in modern ones.

It is both powerful and capable of infinite refinement. It allows for an impressive power or a very expressive lyricism. Its dynamic possibilities go from a barely audible whisper to a wailing scream.
